

PALMETTO PLUS™

OPTIMIZERS/ENDOCRINE

- Furnishes all-natural, standardized botanical extracts
- Provides long-term prostate support for men
- Helps maintain immune function and defend against oxidative stress

ITEM# 128

As men age, many are at risk for developing prostate problems. It is, however, possible for men to maintain health and well-being, if the right steps are taken. A healthy diet and exercise coupled with targeted standardized botanical extracts specifically formulated for prostate health can help men stay healthy as they age.¹ **PALMETTO PLUS™** is an all-natural, comprehensive formula that, over time, may provide long-term support for prostate health.

SAW PALMETTO

Saw palmetto has a long history of use in helping retain a healthy prostate. Considerable clinical research has shown that about 80 to 90 per cent of men using saw palmetto show a positive correlation between saw palmetto and prostate health.²

LYCOPENE AND SOY ISOFLAVONES

PALMETTO PLUS utilizes a highly effective combination of saw palmetto, lycopene, and soy isoflavones, which have been shown to assist in retaining prostate health.³

Lycopene is the most abundant carotenoid (vitamin-like compound) found in the prostate and may play a role in retaining a healthy prostate by enhancing immune function and providing antioxidant protection.³ Soy isoflavones, a group of phytochemicals found in soybeans, have been shown to help maintain health functions throughout the body.⁴

WHY PALMETTO PLUS™?

USANA is one of only a few major manufacturers to combine saw palmetto with lycopene and soy isoflavones in a single product. **PALMETTO PLUS** is a convenient, effective way to obtain a comprehensive men's health formulation at a reasonable price.
